Why the Split Back Veer?

Why the Split Back Veer?

- **Folks do NOT see the Split-Back Veer**
- **Folks can NOT work on stopping this offense in one week.**
- **Do folks know how to stop the Split-Back Veer?**
- **“If there is one constant it’s that there are no constants; over time, everything changes and nothing remains the quite the same.”**
- **Never is it more evident than in the profession of coaching football.**
- **At B.F. Terry ... just as most every high school coach in Texas does ... we’ve done what the ingredients have allowed us to do over the many years here !**

Quarterback Coaching Points- Execution of the Veer

1. Stay on the line on ALL Veer and Option plays.
 - This keeps the defense guessing and cuts down on pursuit
 - More importantly, our execution stays consistent.
2. Carry out ALL fakes and don't watch a dive back that you have given the ball to. Think CONTINUITY!!!
3. A longer ride on ALL meshes gives yourself a better chance at a good read and forces the defender to commit himself.
4. INSIDE VEER:
 - If you can get to the end and pitch-do it!
 - Versus and odd front: "feel" the end as you read the tackle.
 - Be ready to pitch off a "go end"

Quarterback Coaching Points – Execution of the Veer

5. ZONE VEER:

- Versus an odd front, any movement by DT will be a give read. If DT plays a “guerrilla” technique, pull the ball and option the DE.

- Know that 75% of the time, we will give the ball on the zone veer. It is still a triple read option.

6. OUTSIDE VEER:

- If ever in doubt, give the football. The dive back heading up-field will make more yardage than the QB running down the line if you miss the read.

- Read the DE for give or keep and then option secondary force.

- For the most part, the give will make the yardage on the outside veer, except in short yardage where we will be more apt to keep the ball.

Quarterback Coaching Points – Execution of the Veer

7. GENERAL COACHING POINTS:

- Slow play a slow play end until you get the proper pitch relationship.

- Always try to maintain a pitch relationship wherever you are on the field.

- Be disciplined, not mechanical.

- NEVER SWEAT A BAD READ.

- Above all, RELAX and HAVE FUN!
